

The EDI (Electronic Data Interchange) system allows you to **exchange data electronically**, dynamically and reliably with our business partners around the world, streamlining **processes** and reducing document management **costs**.

The messages used are in the international standard format UN/EDIFACT and the codes used in the data exchange correspond to international standard codes, based on the directives of the United Nations Economic Commission for Europe (UN/ECE).

In particular, the UN/LOCODE standard is used for locations, the ISO 3166 standard for countries, the ISO norm no. 6346 codes for the types and sizes of containers.
